About UMD

Since 1983, Unique Micro Design (UMD) has been solving customers' needs for productivity improvement by adding real time visibility and control to software using edgware, IoT and our engineering IoT solutions skills, which reflects our ability to:

- Design and manufacture IoT devices and interface electronics
- Source and integrate ICT products from our agencies
- Support through our professional engineering, software and support services

In simple terms UMD “adds eyes and ears to software”.

UMD is passionate about forming long term partnerships with our customers by delivering engineering, software and support services using emerging technologies. Our tailored solutions are for customers looking for a point of difference, by creating innovative technologies to help them succeed.

Founded 1983

By Geoffrey Ramadan
(CEO and Director)
and Harry Ramadan
(CTO and Director)

Clayton, VIC

Part of the Monash
Precinct, Australia's
largest concentration
of ICT industries

Staff

More than half in
technical roles, solving
customer's needs for
productivity improvement

Edgware

Edgware focus
means efficiency,
effectiveness, ease
and empowerment

IoT Solutions

Our engineering IoT
solutions skills enables
us to enhance products
and their operations
