Certified Supplies

The perfect match for your RAIN RFID printer

Using inlays from leading manufacturers, as well as our own Zebra-branded inlays, Zebra offers 50+ labels in stock. We can also create a custom solution for you—with just about any thermal material and inlay to meet the requirements of your unique application. Designed and tested with Zebra printers and RAIN RFID readers, our Certified Supplies ensure high performance.

General purpose

- Paper and synthetic labels, designed for use with standard applications
- Best for non-metallic surfaces, plastics or corrugate
- ZBR2000 Zebra-branded inlay for longer read ranges and faster tag acquisition

Advanced

- Paper and synthetic labels that offer a higher level of readability performance than our general purpose labels
- ZBR4000 and ZBR4001 Zebra-branded advanced UHF RFID inlays offer a higher level of performance than general purpose inlays

Specialty

- Unique solutions and designs created to maximize read range for metal and challenging surfaces

Print Confident. Print Secure. Print Zebra.

One of the largest offerings of in-stock and ready-to-ship RAIN RFID labels

Outstanding Performance

The latest chip technology and proprietary inlays provide enhanced performance.

Reliable Consistency

The same label material used from order to order results in consistent print and adhesive performance every time.

RFID Solution Expertise

As the developer of RFID readers and printers, Zebra can recommend the labeling solution that optimizes the performance of each RFID solution.

Testing Capabilities

With our Voyantic test equipment, we can identify the optimal inlay for the surface being labeled to ensure maximum read ranges.

In-House Manufacturing Capabilities

Zebra's state-of-the-art presses and RFID manufacturing equipment enables us to meet your RFID supplies need quickly.

The Right Solution for Your Use Case

With over 300 certified combinations of direct thermal and thermal transfer materials and access to inlays from the leading providers, we can deliver the optimal solution for the surface to maximize read performance.

General Purpose RFID Labels

General Purpose RFID Labels Zebra’s General Purpose RFID label offering includes a variety of inlay types and works on most non-metallic surfaces, such as plastic and corrugate. Typical applications include labeling of cases, pallets, products and healthcare specimens. Zebra’s RFID labels have been tested and optimized to work with Zebra’s RFID printers and readers. Due to the many variables that can affect read range, we recommend testing in your environment to determine which label works best in your application.

Labels for Industrial Printers (3" ID, 8" OD)

Thermal Transfer RFID Labels - pair with Zebra's 6000 wax or 3200 wax/resin ribbon
 For use with Zebra's RXi4, ZT400R, ZT600R, and ZE500R

Advanced RFID Labels

Zebra's Advanced RFID labels provide a higher level of read performance than our General Purpose RFID labels in similar applications. Typical applications include labeling of cases, pallets, products and healthcare specimens where longer read ranges are required. Zebra's RFID labels have been tested and optimized to work with Zebra's RFID printers and readers. Due to the many variables that can affect read range, we recommend testing in your environment to determine which label works best in your situation.

Specialty RFID Labels - Jewelry Label

Zebra’s Specialty RFID labels are designed to work with Zebra’s RFID printers and readers. This item has a tail that inserts between two adhesive films creating a loop and a flag securing the inlay to the product. Tail is adhesive free and will not stick to jewelry. Useful for identifying small diameters < 0.3” (8mm).

Labels for Desktop or Industrial Printers (3" ID, 5" OD)

Thermal Transfer RFID Labels - pair with Zebra's 5095 resin ribbon
 For use with Zebra's ZD621R, ZD500R, RXi4, ZT400R, ZT600R

Size			Part #	Perf.	Inlay	Chip	Material	Labels/ Roll	Rolls/ Case	Case Weight	Stock WI	Price/ Roll	Price/ Label

NXP	UCODE 9	96	0	E280 6995	-24 dBm	-22 dBm	

Latest generation highlighted

Additional notes on Read and Write Sensitivity:

6 dBm difference in sensitivity doubles read range, 1 dBm difference increases read range by 12%

Higher absolute numbers for read and write sensitivity will give longer ranges. (-23dBm will have longer read range than -21 dBm, all else held equal)

RFID Item Transitions
