Warehouse Systems

Unique Micro Design (UMD) can automate your warehouse and production process, eliminating labour intensive duties, manually entered data and repetitive physical work.

Our range of solutions, hardware and software will optimise your warehouse, streamline production, accurately record product data, and increase staff productivity.

Professional engineering services are also available for customised solutions, and our support team can resolve any of your technical issues.

Hardware

We are trusted advisors and suppliers to all major vendors

- Handheld and Wearable Mobile Terminals

- Conveyor and Work Station Industrial Barcode Scanners

- Vehicle Mounted Terminals

- RFID readers, RFID printers, RFID labels

- Mobile and Fixed Printers

- Barcoding, Labels and Ribbons

- Print Bureau Services

- Pick to Light

Software

- RFID RACE Cloud (Warehouse Management Solution Integration)

- SOTI
- Software Support and Development

Professional Engineering Services

- Production Monitoring, Temperature, Image Capture, Dimension and Asset Tracking Solutions

- Custom Charging Solutions

- Design, Install and Support Custom Warehousing Solutions

Support

- Wireless and RFID Site Surveys and Analysis

- Device Configuration, Provisioning and Management

- Technical Product Support and Training

Why you should automate your warehouse:

- Minimise human error and improve safety

- Manual labour reduced/eliminated and improve staff satisfaction

- Improve inventory control, analysis and visibility

- Reduce shipping errors

- Product data captured accurately

- Inventory loss minimised

- Eliminate laborious tasks
